## **DETAILED ACTION**

### ***REASONS FOR ALLOWANCE***

1. Claims 1 – 6 and 13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least a first electroconductive layer being patterned in accordance with a desired pattern, thereby defining a number of mutually isolated connection conductors separated by apertures; the bottom surface of a passivating envelope extending as far as the second side of a carrier, but does not cover the second side of the carrier; and characterized in that the envelope is mechanically anchored in the connection conductors, for which purpose the connection conductors are provided with side faces having recesses. Tsuji et al. (U. S. Pat. No. 5,656,550) teaches a first electroconductive layer being patterned in accordance with a desired pattern, thereby defining a number of mutually isolated connection conductors separated by apertures. Jung et al. (U. S. Pat. No. 6,333,252) teaches the bottom surface of a passivating envelope extending as far as the second side of a carrier, but does not cover the second side of the carrier. However, Tsuji et al. and Jung et al. do not teach characterized in that the envelope is mechanically anchored in the connection conductors, for which purpose the connection conductors are provided with side faces having recesses as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
